

HEPAP
@ LBNL, March 03

The Cornell Report

- CLEO/CESR-c have been approved by the NSB. 6 of 13 wigglers now being installed, remainder ~ 1 year from now. Charm region operation will begin in August 2003
- In the last months of Upsilon operation, ~ 4.6 fb^{-1} total were taken on a combination of 1S, 2S, 3S and 5S

Resonance Physics

- Lattice measurables**

- D state masses (and discovery)
- Γ cascades of P states
- $\Gamma(\Gamma \rightarrow ee)$

- Spectroscopy**

- (3S) $\rightarrow \pi\pi\pi$ (2S/1S)
- Γ_b transitions involving Γ , Γ , Γ
- Γ_b , Γ_b' and h_b searches

- And...**

- Squarkonium searches
- (5S)
- ... Measure B_s production
